SWITZER CANYON HOUSE

LOCATION
San Diego, California

CLIENT
Chris + Dana Pichardo

STATS
Renovation of existing: 969 sf
Addition: 1,557 sf

The project included the renovation and addition to a craftsman-style house in a historic working-class neighborhood perched above a dramatic canyon landscape. The addition wraps the existing house and redefines its two prominent facades. Maintaining the distinct relationship to the context of the neighborhood, the main entry reinforces the craftsman roots of the existing house. At the rear, the house opens up and projects outward toward the canyon offering unprecedented experiences of the dynamic landscape and views of downtown San Diego.
