To whom it may concern,

It is my pleasure to offer my unqualified recommendation of CUBE Design. + Research. In the fall of 2010, I commissioned CUBE to plan and design a speculative retail concept that I had been working on for some time. While I had a very defined sense of the financial and operational structure of my project, I lacked a clear vision for how the space should look and function.

On their first attempt, and with little support from me, CUBE created a coherent and thoughtful vision that far exceeded my expectations. Their design was logical, coherent and attractive. Their work made promoting my project simple and made my unique concept easy for anyone to understand in a short amount of time.

Over the course of my career, I have had the pleasure of working with many creative and thoughtful architects. CUBE distinguished themselves through their mix of creativity, logic and organization. Please do not hesitate to contact me should you require additional information.

Sincerely,

Michael Tilford
